# KSHITIJ Hedging Method

**Do you need to know...**

- Where is the market going?
- What to hedge?
- How much to hedge?
- When to hedge?
- For what period to hedge?
- Which hedging tool to use?
- How to measure performance?

**KSHITIJ.COM Hedging Method - 2006-08**  
Enables both Exporters and Importers to profit

The **KSHITIJ Hedging Method** provides an answer to all your questions, and most importantly, makes money!

The **KSHITIJ Hedging Method** is a full-fledged, complete, end-to-end Forex Risk Hedging Methodology based on the revolutionary concept of Dynamic Benchmarks. It has been tested over three different market conditions (ranged, falling and rising) and has resulted in a positive net margin between Exports and Imports, which has averaged 2.8% p.a. over the last three years.

The KSHITIJ Hedging Method				
	2006-07	2007-08	2008-09	3 Yr Avg
<b>Exports</b>	45.56	43.30	42.93	43.93
Benchmarks	45.24	42.76	41.42	43.14
<b>USD-INR</b>	45.19	40.24	44.75	43.40
<b>Imports</b>	45.28	40.97	42.06	42.77
Exp - Imp	0.28	2.32	0.87	1.16
% Gain	0.6%	5.6%	2.1%	2.8%

Avg Export-Import Margin over 3 years

**2.8%**

Using this method, Exporters have been able to sell their Dollar Receivables along the **Green** line in the chart above, while Importers have been able to buy their Dollar Payables along the **Red** line, earning a huge Export-Import margin as a result, averaging 2.8% over the last three years.

This is **REAL** cash profit that sits in your company's balance sheet.

If you would like to get the power of the **KSHITIJ Hedging Method** on your side, call us **NOW!**

The first 25 enquiries will receive a **FREE** copy of our current Quarterly Long Term Dollar-Rupee forecast.

And a **MEGA OFFER!** If you retain our services for Risk Management, using the **KSHITIJ Hedging Method**, we will throw in the full Dollar-Rupee forecast package in, for **FREE!**
